FOREST IBC FUEL OIL TANK

A fuel oil transportation solution for forestry machine professionals.

Forest IBC fuel oil tank is designed in cooperation with forest machine professionals. As a result it offers many highly valued features and solutions to the end user.

CONSTRUCTION

Professional transportable tanks for the successful site refueling.

Farmtools transportable tanks are designed to withstand under harsh and demanding conditions.

IBC tanks for construction use are equipped with containment basin and with sturdy cover.

There are several other products designed together with construction professionals to enable the safest fuel transport to the site.

AGRICULTURE

High quality and safe FARMEX tanks ensure an efficient fuel supply.

We have been a reliable partner for Finnish farmers for decades. Farmtools is the most appreciated fuel oil tank producer among the farmers.

Large variety of fuel oil tanks, capacity from 1450 l to 10 000 as a standard. Several possibilities of accessories and pumps available.

FARMEX fuel oil tanks are produced also with an unique FARMEX 100% containment basin / double wall system.

FARMEX COVER

Fuel oil Tank Protection

Farmex Cover Fuel oil Tank Protection functions as a perfect protection for your tank. It protects the fuel and tank inside from the changing weather conditions. It means less condensed water in the fuel and less damage for the machinery.

We do regular product development together with our customers, this ensures functional and cost-effective products.
